Fresh

A fresh color scheme revolves around the universally appealing secondary color, green. Green is a color associated with healing, prosperity, rebirth, harmony, tranquillity, and generosity. This lovely hue strikes a balance between warm and cool, and conveys the extroverted, communicative aspect of yellow with the peaceful, inspired effects of blue. A fresh color scheme is restful to the eye, giving a

sense of relaxed readiness and eternal spring. Because green is a hue that graciously recedes, other hues—particularly its complement, red—seem to advance and grow brighter in its presence. The fresh color palette recalls misty green islands, rain forests, pristine lawns, and fields of tulips. In its analogous palette, it suggests green hills above a blue-green ocean. The tender beauty of a natural environment is always evoked by this color scheme.
