Subject Index	291

"A welcome addition to the serious study of children's literature and a must for any institution with programs in children's studies."

—**Choice**

**How Picturebooks Work** is an innovative and engaging look at the interplay between text and image in picturebooks. The authors explore picturebooks as a specific medium or genre in literature and culture, one that prepares children for other media of communication, and they argue that picturebooks may be the most influential media of all in the socialization and representation of children. Spanning an international range of children's books, this book examines such favorites as *Curious George* and *Frog and Toad Are Friends*, along with the works of authors and illustrators including Maurice Sendak and Tove Jansson, among others. With 116 illustrations, **How Picturebooks Work** offers the student of children's literature a new methodology, new theories, and a new set of critical tools for examining the picturebook form.

**Maria Nikolajeva** is Associate Professor in Comparative Literature at both Stockholm University and Åbo Academy University.

**Carole Scott** is Professor of English and Former Dean of Undergraduate Studies at San Diego State University. She supervises the Graduate Specialization in Children's Literature at SDSU.
