

THE HISTORY OF MONEY FOR UNDERSTANDING ECONOMICS

Second Edition

Essay on History

Vincent
LANNOYE

Table of Contents

Prologue.....	xxi
Warning!.....	xxv
Preamble about chapter 1 and early antiquity.....	xxix
Synoptic Table.....	xxxiii

1. Birth of Monetary Units in Early Antiquity

From taxation-redistribution to early market economy after 4000 BC.....	1
<i>Production specialization and surpluses after 10,000 BC</i>	
<i>Taxation-redistribution inside the community in 4000 BC</i>	
<i>Production exchanged at the marketplace</i>	
<i>Long-distance trade alongside taxation-redistribution</i>	
<i>Slow evolution from taxation-redistribution to market economy in antiquity</i>	
Values for exchanges.....	9
<i>Authoritarian influences on the values of goods</i>	
<i>Exchange values haggled in markets</i>	
Counting in intermediate-commodities.....	11
<i>Exchanges for intermediate-commodities in the Neolithic</i>	
<i>Simplifying transactions</i>	
<i>Saving surpluses to postpone spending</i>	
<i>Price in intermediate-commodities for counting and memorizing market equivalences</i>	
<i>Accounting in the taxation-redistribution system</i>	
<i>Need for loans</i>	
<i>Intermediate-commodities, scientifically called “protomoney”</i>	

From intermediate-commodities to silver ounce money.....	19
<i>Discarding unreliable intermediate-commodities</i>	
<i>Silver or gold ingots after 2000 BC</i>	
<i>Intermediate-commodities spread by codes from 2400 BC</i>	
<i>Silver and gold ounces, popular standards of value</i>	
<i>Silver ounces, main standard of value in 2000 BC</i>	
<i>Silver ounces and the characteristics of money</i>	
Historical Correlation:	
Intermediate-commodities or protomoney, and early antiquity.....	27

2. Coins: Catalyst of Antiquity

Coins after 640 BC.....	31
<i>Tiny ingots struck with a royal seal</i>	
<i>Profit on coins</i>	
<i>Silver coins in Greece after 595 BC</i>	
<i>Silver coins valued by weight in the Mediterranean</i>	
<i>Gold and silver bimetallism after 550 BC</i>	
<i>Bimetallism in the Persian Empire after 546 BC</i>	
Coins by weight in Greece's marketplaces.....	38
<i>Coinage diffusion in Greece in the fifth century BC</i>	
<i>State finance increasingly centered on coins</i>	
<i>Greek coins standardized around Athens after 450 BC</i>	
Coinage: ferment of empires.....	41
<i>Bimetallic coins in the Macedonian Empire</i>	
<i>The Republic of Rome</i>	
Moneychangers: guarantors of coin value.....	44
<i>Necessity of moneychangers</i>	
<i>Gold coins inspected</i>	
<i>Silver coins suspected of forgery</i>	
Banking as an offshoot of money in antiquity.....	48
<i>Money safe in banks</i>	
<i>Banking evolution in antiquity</i>	
<i>Loans as a consequence of bank deposits</i>	
<i>Banking services restricted to merchants</i>	
<i>Antiquity without scriptural money</i>	
<i>Banks inaccessible to non-trading people</i>	
Historical Correlation:	
Coins: more peacemaker for civilization than "sinew of war" for empires?.....	56

3. The Roman Empire and Coin Multiplication

Financial concerns for the Empire in the first century AD.....	61
<i>From restrained gold and silver monetization to recurring lack of coins</i>	
<i>Debt accumulation</i>	
<i>Recurrent financial crises during the first century AD</i>	
Quick fixes to treasury crises in the first century AD.....	64
<i>Tax reform under Augustus</i>	
<i>Token coins under Augustus</i>	
<i>Nero: coins multiplied by debasement and weight-reduction</i>	
Inflation in the late first century AD.....	70
<i>Rising prices: a consequence of coin multiplication</i>	
<i>Continuous and prolonged rise in prices, or inflation</i>	
<i>Inflation in the Empire</i>	
<i>Other price variations not considered to be inflation</i>	
<i>The key to inflation: excess spending and lack of investment by the Roman government</i>	
Winners and losers of price inflation after the late first century AD.....	77
<i>Losses for some</i>	
<i>Gains for others</i>	
<i>Short-sighted gains for the government</i>	
Economic stagnation from the first to the third century AD.....	80
<i>Demagogy financed by taxation and coin multiplication</i>	
<i>Work partly discouraged by inflation</i>	
<i>Limited coin multiplication and subsequent moderate inflation</i>	
<i>until the late second century AD</i>	
The Crisis of the Third Century AD.....	83
<i>Declining economy in the early third century AD</i>	
<i>The Crisis of the Third Century AD</i>	
<i>Peak of coin multiplication around 260 AD</i>	
<i>Inflation takeoff after 260 AD</i>	
<i>Monetary and banking crisis circa 265 AD</i>	
<i>Military rescue of the Empire financed by... coin over-multiplication</i>	
Failure to curb inflation in the late third century AD.....	89
<i>Ineffective monetary reform to subdue inflation</i>	
<i>Unsuccessful "edict of the prices" to freeze inflation</i>	
Inflation circumvented, reviving the Empire during the fourth century AD.....	91
<i>Tax reform of Diocletian</i>	
<i>More good coins under Constantine</i>	
<i>Fall of the Roman Empire in the fifth century AD</i>	
Historical Correlation:	
Monetary obstacles contributed to the fall of the Roman Empire.....	94

4. From Lack of Coins during the Middle Ages to Banking and the Renaissance

Coin circulation in Western Europe from the seventh to the twelfth century.....	99
<i>With neither coins nor banks since the fall of Rome</i>	
<i>Payments in coins returning in the seventh century</i>	
<i>Diverse coins of feudalism from the tenth to the twelfth century</i>	
Coins transmuted in the thirteenth century.....	104
<i>New wave of silver and gold coins diffused by trade</i>	
<i>Bimetallism and the fluctuating gold-silver ratio</i>	
<i>Moneychangers increasingly vigilant</i>	
<i>Trade pressure for better coins and moderate seigniorage</i>	
<i>Progressive unification of currencies</i>	
<i>Debasement contained</i>	
The economic decline of the fourteenth century combining with deflation in the fifteenth century.....	113
<i>The decline of silver supply hidden by the plights of the fourteenth century</i>	
<i>Deflation reflecting the lack of coins in the late fourteenth century</i>	
<i>People resist pay cuts, even if prices of goods are dropping</i>	
<i>Deflation marked by a slow decline of prices</i>	
<i>Trade obstructed by the "bullion famine"</i>	
<i>Growing tolerance of interest on loans</i>	
Deflation circumvented by Italian merchants in the fourteenth and fifteenth centuries.....	119
<i>Reappearance of banks</i>	
<i>An innovation: the bill of exchange</i>	
<i>The bill of exchange: source of loans</i>	
<i>The bill of exchange possibly discounted</i>	
Bankers financing the Renaissance in the fifteenth century.....	123
<i>The nobles, the Church, the bankers and the Renaissance</i>	
<i>Government bonds and state banks</i>	
Deflation dodged in the sixteenth century, and economic improvement.....	126
<i>Token coins re-introduced</i>	
<i>New sources of noble metals and economic improvement</i>	
<i>Deflation followed by some inflation</i>	
Inflation limited by mercantilism in the sixteenth century.....	130
<i>Stashing tolerated, thanks to the Renaissance</i>	
<i>Mercantilist policies put in place</i>	
Historical Correlation:	
Dual evolution contrasted with or without banks.....	134

5. From Printing Banknotes to the Industrial Revolution

Scarcity of coins in the seventeenth century.....	139
<i>Deflation in Europe</i>	
<i>Less recession and deflation in the Netherlands and in Great-Britain</i>	
<i>New financial concepts</i>	
Appearance of the banknote in England in the seventeenth century.....	146
<i>Birth of English banks</i>	
<i>Appearance of banknotes</i>	
<i>Issues of banknotes restrained by convertibility</i>	
<i>First bank runs</i>	
<i>Convertibility of banknotes restricted to gold coins after the “Great Recoinage”</i>	
<i>Other changes for British currency</i>	
Loan multiplication and the Industrial Revolution in the eighteenth century.....	155
<i>Loans with guarantors in Scotland</i>	
<i>Rise of capitalism finances the Industrial Revolution</i>	
<i>Multiplication of paper money without inflation</i>	
<i>Scriptural money outnumbered coins</i>	
The Bank of England and its banknotes in the eighteenth century.....	162
<i>The Bank of England created to fund the government</i>	
<i>The popular banknotes of the BoE</i>	
<i>BoE under supervision</i>	
<i>Stabilization of private banks</i>	
Historical Correlation:	
Industrial Revolution and banknotes.....	168

6. Failures and Successes of Paper Banknotes in the eighteenth century

Banknotes discredited in France after 1720.....	173
<i>The system of John Law</i>	
<i>Chaotic issues of banknotes and speculation on shares</i>	
<i>Collapse of the system</i>	
<i>Aftermath of the failure</i>	
Debacle of the “continentals” in the US around 1780.....	179
<i>Issues of credit notes</i>	
<i>The “continentals” of the American Revolution</i>	
<i>Toward inflation</i>	
<i>Liquidation of credit notes and the aftermath</i>	
Failed maneuver: amended currency in Liège in 1783.....	184
<i>Liège's economy trapped in deflation in 1783</i>	

<ul style="list-style-type: none"> <i>Measures to frame a parallel monetary system to finance the cleaning of the city</i> <i>Cleaning-tasks selected according to 3 principles</i> <i>First cleaning-task</i> <i>Other projects delayed or rejected</i> <i>Arguments to support the parallel system</i> <i>Application of the parallel system from 1783 to 1784</i> <i>Bid to extend the system, and its sudden liquidation</i> 	192
Collapse of the assignats of the French revolution around 1795.....	192
<ul style="list-style-type: none"> <i>Creation of the assignat in 1789</i> <i>Inflation and economic crisis</i> <i>Liquidation of the assignats</i> 	196
The Napoleonic Wars and banknotes.....	196
<ul style="list-style-type: none"> <i>Few issues of banknotes in continental Europe</i> <i>Great Britain strengthened by its banks</i> <i>Temporary inconvertibility of banknotes of the BoE</i> 	
Historical Correlation:	
Monetary mismanagement and their effects on the Crowns of England and France.....	202

7. Banknotes, the Gold Standard and Economic Cycles in the nineteenth century

Brief economic depression in Great Britain around 1820.....	205
<ul style="list-style-type: none"> <i>The Gold Standard for BoE banknotes</i> <i>Organized deflation</i> 	
Economic cycles discerned after 1820.....	209
<ul style="list-style-type: none"> <i>Agricultural society integrated into the industrial world</i> <i>Economic rises alternating with falls</i> <i>Recessions amplified by stock exchange crashes and bank runs</i> <i>Cycles discerned, but misunderstood</i> <i>Growing opposition</i> <i>Ill-informed debates in the nineteenth century</i> <i>Goal of the authorities: ensuring gold convertibility</i> <i>Monetary influence later confirmed</i> 	
Expansion of the Industrial Revolution on the European continent after 1830.....	220
<ul style="list-style-type: none"> <i>Bimetallic conversion of banknotes from 1830 to 1870</i> <i>Unequal progress on the European continent between 1830 and 1870</i> 	
The Gold Standard and the "Long Depression" after 1873.....	223
<ul style="list-style-type: none"> <i>Problems with bimetallism</i> <i>From bimetallism to the English model of the Gold Standard</i> <i>Collective leap toward the Gold Standard in the 1870s</i> 	

<i>The exchange rates of banknotes tied to the Gold Standard</i>	
<i>Deflation between 1873 and 1896</i>	
<i>Free trade dismissed by protectionism after 1873</i>	
<i>Shaky economic recovery after 1896</i>	
End of British supremacy in the late nineteenth century.....	233
<i>British industry losing its edge</i>	
<i>The US, the world's first economy</i>	
<i>The National Banks created in the US in 1863</i>	
<i>The Federal Reserve of the US, created in 1913</i>	
Historical Correlation:	
Deflation in the late nineteenth century and the fever of nationalism.....	242

8. Dollars, Banknotes and Keynes from 1914 to 1971

Gold Standard disruptions during World War I.....	245
<i>Gold coins replaced by banknotes during World War I</i>	
<i>Wartime financing by inflationary deficit</i>	
<i>The US back on the Gold Standard after the war</i>	
<i>European countries and the Gold Standard in the 1920s</i>	
<i>The pound sterling of the BoE and prewar parities</i>	
Hyperinflation in Germany.....	251
<i>Inflationary monetary policy during WWI</i>	
<i>Plunge toward hyperinflation in 1922-1923</i>	
<i>Remarkable cure of hyperinflation in 1924</i>	
<i>Return to limited gold convertibility for the new reichsmarks</i>	
Stock exchange crash of 1929.....	257
<i>Speculation on Wall Street amplified by the Fed in the 1920s</i>	
<i>Crash on Wall Street in October 1929</i>	
<i>Poor reaction of the Fed and consequent world economic crisis</i>	
Theories of Keynes around 1930.....	261
<i>A new monetary policy suggested by Keynes</i>	
<i>Money supply freed from the Gold Standard</i>	
<i>Loans to restart the economy</i>	
<i>Government stimulus</i>	
<i>The public debt: temporary, and not to replace taxation</i>	
Gold convertibility partially repealed in the 1930s.....	267
<i>Toward a new international monetary system around the dollar in the 1930s</i>	
<i>Weak economy without Keynesian government spending in Europe during the 1930s</i>	
Keynesian theories in the US after 1932.....	269
<i>End of full gold-convertibility of the dollar</i>	

<i>Dollar devalued in comparison to gold and foreign currencies</i>	
<i>The ounce of gold stabilized at 35 dollars-banknote</i>	
<i>Fed under more democratic control</i>	
<i>Low interest rates</i>	
<i>More loans from the Fed to help private banks</i>	
<i>The New Deal: restrained public deficit</i>	
<i>From deflation to moderate inflation</i>	
Prodigious economic recovery in Nazi Germany after 1933.....	277
<i>Immense government deficit covered by debt</i>	
<i>Inflation and exchange rates under control</i>	
<i>Full employment in Nazi Germany</i>	
World War II and monetary battles.....	281
<i>Keynesianism during the war</i>	
<i>Wartime international trade and gold</i>	
<i>Counterfeit money of the “Bernhard Operation”</i>	
<i>Another wave of hyperinflation in Germany in 1945</i>	
Bretton Woods in 1944 and the postwar “Golden Age of Capitalism”.....	284
<i>Return to prewar fixed exchange rates</i>	
<i>Exchange markets around the dollar</i>	
<i>IMF created to support fixed exchange rates</i>	
<i>The postwar economy supported by Keynesianism</i>	
<i>Treasury bonds, bank loans and inflation risks</i>	
Historical Correlation:	
Keynes on the sidelines and Schacht in the limelight during the inter-war period.....	293

9. The Rise of Monetarism in the 1970s

The end of gold convertibility of the dollar after 1971.....	297
<i>Multiplication of dollars</i>	
<i>US trade deficit and tensions on exchange rates</i>	
<i>End of dollar-banknote’s convertibility into gold</i>	
New soul and origin of money.....	301
<i>Value of money officially based on legal tender</i>	
<i>Money: simple measurement of goods produced</i>	
<i>Limited monetary creation by the government</i>	
<i>Most monetary creation by private banks</i>	
<i>Banks can’t create money alone, without customers</i>	
<i>Money: digits on computer hard drives</i>	
<i>Coins as supplement to banknotes</i>	
<i>Without any public controls such as a gold convertibility?</i>	

<i>The tools of the Fed for limiting money supply</i>	
<i>The fourth tool of the Fed: the Federal Funds Rate</i>	
Breakdown of fixed parities followed by devaluations after 1973.....	313
<i>Breakdown of fixed exchange rates around 1973</i>	
<i>Return of devaluations of currencies</i>	
<i>Devaluations: very harmful for some</i>	
<i>Potential financial crisis</i>	
Rise of inflation and unemployment in the 1970s.....	317
<i>Measure of inflation</i>	
<i>Surge of inflation from money multiplication</i>	
<i>Economic crisis and mass unemployment</i>	
<i>Health of the economy measured by GDP growth</i>	
Fight against inflation in order to regain economic growth around 1980.....	325
<i>Keynesian priorities challenged by monetarism</i>	
<i>Inflation, root of all evil</i>	
<i>Uncontrolled money supply, single source of inflation</i>	
<i>Manipulating interest rates to contain the money supply and curb inflation</i>	
<i>Fight against public deficits in order to limit inflation</i>	
"Reaganomics" in the US after 1980.....	333
<i>Objective: free markets</i>	
<i>Supply-side economics</i>	
<i>Factor 1: trim taxation excess</i>	
<i>Factor 2: additional tax cuts during a crisis</i>	
<i>Factor 3: deregulate</i>	
<i>Factor 4: encourage work</i>	
<i>Factor 5: favor international competition</i>	
<i>Curbing inflation with the Federal Funds Rate</i>	
<i>High interest rates: a limited gift for banks</i>	
<i>Long-term interest rates less affected by the Federal Funds Rate</i>	
<i>Another tool still in place for controlling the money supply: Open Market operations</i>	
<i>Other tools ignored</i>	
<i>The Fed's profits, if any, are for the Treasury</i>	
<i>Monetarist and Keynesian mix, or "Reaganomics"</i>	
Dollars similar to gold coins after 1980.....	346
<i>The dollar: virtual standard for currencies</i>	
<i>Currencies officially "pegged" to the dollar</i>	
<i>Dollarization</i>	
<i>"Dollar mine" and US trade deficit</i>	
<i>SDR of the IMF failed to compete with dollars</i>	
European currencies stabilized before the introduction of the euro in 1999.....	352
<i>End of Keynesianism in Europe after 1980</i>	
<i>Europe moving toward monetarist and neoliberal policies in the 1980s</i>	
<i>The EMS</i>	

The ECB and its euro

Multiple national Treasuries in the eurozone

Historical Correlation:

The US tamps down inflation and its economy dominates the world.....362

10. Troubles with Monetarism

Two economic glitches at the turn of the twenty-first century.....365

The recession of 1990-91

Inflation target in the 1990s

Federal Funds Rate set explicitly after 1994

Second economic slowdown in 2001

Return of economic growth in 2003 driven by Reaganomics

Controlling inflation

Monitoring exchange rates

Limits of Reaganomics in European countries

Third glitch: the financial crisis of 2008.....375

Ambiguous task for the Fed after 2004

Mortgage rates and housing prices

Housing bubble starting to deflate in 2007

Financial institutions threatened by the shaky housing market

Some banks short of cash in 2008

Systemic risk with the CDS

Fed helping banks

Fed unprepared to save all financial institutions

The crisis explodes in September 2008

TARP for the US Treasury in October 2008

TARP's controversy

Fed pushing rates down, by paying interest on required reserves

Fed monitoring the "shadow banking system"

The Fed unusual measures to help "shadow banks"

Fed pressuring mortgage interest rates to help housing

Fed pushing down long-term interest rates to help the recovery

QE extensions and the balance-sheet of the Fed

"Stimulus packages" by the government

Public debt swelling

Doubts

Low consumer confidence and slow velocity of money

Historical Correlation:

In search of a broader solution.....399

11. Secondary Currencies and Parallel Economies in Modern Times

The five currencies of Argentina after 2001.....	403
<i>Origin of the 2001 Argentinean crisis</i>	
<i>New currencies to circumvent the “corralito”</i>	
<i>“El crédito”: helping to start an economy among the poorest</i>	
<i>End of the “corralito” and alternate currencies</i>	
The black market constrained by lack of its own currency.....	408
<i>The black market to circumvent government's control</i>	
<i>Characteristics of the black market</i>	
<i>Monitoring of bank accounts limits the black market</i>	
Service-notes in European countries.....	412
<i>A new parallel currency starting in the 1990s</i>	
<i>Circulation of these service-notes</i>	
<i>Bringing underground jobs back into the regular economy</i>	
Historical Correlation:	
Economists overlook parallel economies.....	415

12. A parallel currency to fight global warming

A Parallel System to push back deflation... and fight global warming.....	419
<i>A parallel monetary systems to dodge deflation</i>	
<i>Updated Comhaire's system, or the Green-Market System</i>	
<i>Tax-free characteristic of the Green-Market System</i>	
<i>Scope of green-products</i>	
<i>Not intended as a CO₂ gauge for production of goods</i>	
<i>Origin of green-currency: Fed and private banks</i>	
<i>Green-Market System and circulation of green-currency</i>	
<i>Control of the Green-Market System</i>	
<i>One unique fee for the entire Green-Market System</i>	
<i>Regulation of the green-currency</i>	
Benefits of the Green-Market System.....	435
<i>More money in hand with the tax-free Green-Market System</i>	
<i>Economy will dodge deflation, with a faster velocity of money</i>	
<i>Simpler approach, instead of bureaucratic regulations</i>	
<i>Cheaper green-products</i>	
The US political fight.....	438
<i>No political approval for green-money as a CO₂ footprint gauge</i>	
<i>Cranking up the Green-Market at the state level</i>	
<i>The US federal government to stabilize the economy</i>	
New Kyoto and international Green-Market.....	444

Foreign nations will look at the US progress

US-led international agreement

Historical Correlation:

A monetary solution to global warming?.....447

Bibliography.....449

Origin of illustrations:.....453

Index of the Main Definitions.....457

Economics, cornerstone of politics

Examining politics demands an understanding of economics. This science remains the main constraint of any government's actions.

And, money is the key to learning economics. If money is well understood, it will clarify seemingly impenetrable economic events.

The History of Money for Understanding Economics is an indispensable reference to decrypt economics, and it does so in an enthralling way, from antiquity to the present day, with readily accessible language.

The book answers the following questions: How did money appear? What precisely is a bank? Why did gold coins vanish after circulating for centuries? Is there anything behind the value of paper banknotes? What is inflation? What is the IMF? Is the US trade deficit bearable?

A monetary solution, rather than a political one

This book joins other groundbreaking interpretations of history that have underscored the influence of the management of money. This book explains how monetary changes have significantly catalyzed events from the fall of the Roman Empire to World War II and beyond.

Considering such past monetary influences, can a solution to global warming be found in a monetary breakthrough? Indeed, Lannoye challenges the reader with a monetary innovation to finance a green economy.

Vincent Lannoye was born in the US and grew up in Belgium in an industrial family which sparked his curiosity to analyze and critique economics and politics. An engineer with a MBA from Edhec France, today he works in high-tech in Silicon Valley.

His past, his passion for history, the lack of works explaining money and banks, and his monetary ideas, all have inspired him to write about economics.
